

## **RISE PURCHASES EXPLORATION DRILL RIGS**

**June 7, 2018 – Vancouver, British Columbia** – Rise Gold Corp. (CSE: RISE, OTCQB: RYES) (“Rise Gold” or the “Company”) announces it has purchased two diamond core drilling rigs for exploration at the Idaho-Maryland (“I-M”) Gold Project.

Rise Gold has purchased a powerful deep hole rig (“Rig #1”) capable of drilling HQ-size core to depths up to 2,050 m (6,750 ft) and NQ-size core to depths up to 2,745 m (9,000 ft). Rise Gold also purchased a smaller drill rig (“Rig#2”) which will be modified by the Company to achieve depths with NQ-size core up to 900 m (2,950 ft).

The Company will operate the drill rigs with its own employees and Rig#1 will be in operation before mid-June. The Company believes that it can achieve significant cost savings and productivity improvements through the operation of its own drill rig for exploration at the I-M Gold Project. Mr. Michael Leclerc has been appointed as Drill Operations Manager for Rise Gold and has extensive experience with exploration core drilling.

The drill rigs, drill rods of HQ and NQ-size, and accessories were purchased for a price of CDN\$611,000. The purchase is financed by the vendor and will be paid in equal monthly installments over an 18-month period with an interest rate of 5% per annum.

Drilling to date has been done by contractor drillers and three exploration drillholes (B-18-02, B-18-03, and B-18-04) have been completed since announcing the resumption of drilling at the I-M Gold Project on April 25<sup>th</sup> 2018. Multiple quartz veins at the Brunswick Mine were successfully intersected below the existing workings and samples have been submitted for assay. The Company expects to provide the assay results from these drill holes shortly.

### **About Rise Gold Corp**

Rise Gold is an exploration-stage mining company. The Company’s principal asset is the historic past producing Idaho-Maryland Gold Mine located in Nevada County, California, USA. The Idaho-Maryland Gold Mine is one of the United States’ greatest past producing gold mines with total past production of 2,414,000 oz of gold at an average mill head grade of 17 gpt gold from 1866-1955. Rise Gold is incorporated in Nevada, USA and maintains its head office in Vancouver,

British Columbia, Canada. Historic production at the Idaho-Maryland Mine is disclosed in the Technical Report on the Idaho-Maryland Project dated June 1st, 2017 and available on [www.sedar.com](http://www.sedar.com).
