

EXPLORATION DRILLING HAS COMMENCED AT IDAHO-MARYLAND

October 23, 2017 – Vancouver, British Columbia – Rise Gold Corp. (CSE: RISE, OTC: RYES) (“Rise” or the “Company”) is pleased to announce that exploration core drilling from surface has commenced at the Idaho-Maryland Gold Project located in Nevada County, California. The first exploration drill hole has been collared, cased to bedrock, and the rock core is now being logged.

The first drill hole will drill through the Brunswick “Porphyrite” Block and terminate in the surrounding serpentinite which hosts the Idaho mineralization. The first hole is expected to pierce a number of Brunswick style gold-quartz veins and stock-work zones. The end of hole target is the downward extension of the Idaho #1 Vein. Past production of the Idaho #1 Vein is estimated at 935,000 oz gold at an average mill head grade of 38.6 gpt gold.

The Company is drilling a series of widely spaced holes to test a target area on the western side of the I-M Deposit below the area where the historic operator ceased operations upon the mine’s shutdown in 1942 and 1955. Details on the drilling program were previously disclosed by news release on September 21st 2017.

The Company will provide further updates on results as drilling progresses to depth.
